

Lindbrook's Recycling Program to Open Soon

The long awaited recycling program at Lindbrook Transfer Station is set to open on Thurs, Nov. 30. Staff have been placing collection bins in our new Resource Recovery Area and are currently finalizing the details of this program. Customers to the transfer station have been watching the changes at the site over the past few months and are eagerly anticipating the start of the recycling program.

Residents will soon be able to bring their mixed paper and cardboard to this site for recycling. These materials will be made into new fibre products such as paper towels and new cardboard boxes. Metal goods, which includes things like metal chairs and broken bicycles, will also be collected. What is new however, is that metal food cans will be included in this program. Clean soup and tuna cans will be collected along with all the other metals. The metal recycled in this program will be made into other metal products, such as rebar. Paint, aerosol cans, used oil, filters and jugs, propane bottles, and antifreeze will also be collected.

Clean, unpainted, untreated wood as well as brush under six inches in diameter will be collected, chipped and used in our operations. It is important that there are no nails or screws in this wood. If the final chipped wood product is used on access roads to control muddy conditions, tires may be punctured when driving on the chipped wood if the material contains nails and bits of metal.

Unfortunately, due to China's decision to no longer accept mixed plastic, there is not a current market for this product. Other municipalities that are collecting this mixed material are storing the plastics while searching for new markets. We have opted not to start collecting until we have located a market as this may change our collection process. Please stay tuned and we will let you know once we can start accepting certain types of plastics.

In addition to the expanded recycling program, Beaver County residents can bring their large items for disposal year-round, instead of waiting for our spring and fall collection events. This includes "white goods" such as stoves and washers and even Freon-containing appliances such as refrigerators and freezers. There will be a \$25 charge per appliance that can be paid when bringing these items directly to Lindbrook Transfer Station.

If you have any questions about our expanded recycling program, please call our office at 780.663.2038.
